At the year of 2012, the android ICs Smartphone enhancement is growing faster. There are higher performance, more complete features offered, the more sophisticated technology used, to know what any Android products which have the best features offered in all facilities offered. There are the top 8 of the best approaching Android ICS Smartphone in 2012.

Number one is occupied by HTC Edge. It is still to be a secret due to no official announcement for this approaching product. But from rumor gotten, it will be powered by 1.5GHz Quad Core NVIDIA Tegra 3 and also supported by Android 4.0 Ice Cream Sandwich with HTC Sense UI for the Operating system. It is outfitted by camera 8MP as well.

The second number is occupied by HTC Primo. This primo will be powered by 1GHz Dual Core Processor, different with the Quad one. It will also be featured by Beats Audio System which could me it more amazing. Moreover, the price offered for this device is approximately \$300 - \$400 with OS used as the same with the Quad series and also outfitted by 5MP camera.

The third number is occupied by HTC Ville with outfitted by the thinnest handset of Smartphone. Besides, it is also completed with the cool Beat Audio and 1.5GHz Dual Core CPU for the processor. The camera is still in 8MP.

The fourth number is occupied by LG X3. Just like HTC edge, it has quad core handset for you who love this feature. The other superiority features offered is the slimmest dimension which has no more than 9 mm. the processor powered is 1GHz Quad Core CPU and has camera in 8MP.

Sony Xperia S is the fifth number of the best approaching Android ICS. It could be claimed as the most elegant Android phone in this year. It uses 1.GHz Dual Core Qualcomm MSM8260 Snapdragon for the processor and also uses Gingerbread Operating system which is upgradable in Ice Cream Sandwich OS. The camera has the higher acuity with 12 MP and also has display 4.3 inch.

The sixth number is Sony Xperia Ion, the cousin of the S series. With the Xperia s series, it is almost the same except the feature of 3D sweep panorama and face/smile detection for the camera capability and the slightly wider in the display screen. It also will be attached with AT&T's blazing-fast 4G LTE network.

The seventh number is occupied by Sony Ericsson LT22i Nypon. It is a rumor that NenaMark Benchmark will be the creator of the appearance. The price offered for this approximately \$450. The processor used is Dual Core NovaThor U8500 Chipset whereas the other features are
